Fullstack Developer (Candidate Test)

About the Test

https://shorturl.at/byG15

Instructions:
- Create a CRUD Application similar to the design
- Ability to Add a risk owner
- Ability to Edit / Update risk owner
- Ability to delete a risk owner
- Should be mobile responsive

Tech stack:
- Preferable to use Laravel
- You may use Nestjs, Express, Django etc
- No Java,
- Project file may be sent via link (WeTransfer), Google Drive link etc.

Pro-Tip! Avoid hard-coding values and duplicating code. Spaghetti code is also a big no-no. Hacking someone else's GitHub / Bitbucket project isn't going to fly either.

Another Pro-Tip: If you are consulting ChatGPT, please share your prompts.
